Mr. Richard McCree, President  
McCree Construction Company, Inc.  
500 E. Princeton St  
Orlando, FL 32803

Dear Richard,

McCree has been an integral part of our building program for the past three and a half years. I wanted to take a moment to personally say thank you for the on-going commitment that you and your team have made to the OCPS building program.

McCree has been an outstanding business partner to OCPS on many of our projects, delivering quality projects on time and on budget. More importantly, the teams of individuals that have been assembled for each project have worked cohesively, with the primary focus of responding to the Owner's needs and priorities. To have obtained the level of quality and consistency throughout the design and construction process is a testament to your leadership and McCree's ability to "field the right team". I believe this to be the consummate mark of excellence in our industry!

In closing, thank you for the successes you have created for the District. It has been a distinct pleasure and privilege working with your team on our school projects. Please convey my congratulations to each and every team member for a job well done. It is without reservation that I recommend you and your company to any District desiring success with their building program.

Sincerely,

Orange County Public Schools  
Eric Shawn Houston, Architect  
Senior Director, Design and Construction
