FOR IMMEDIATE RELEASE:

**MCCREE COMPLETES DRAWINGS AND BEGINS PREPARATION FOR
CONSTRUCTION ON LDS MIAMI**

ORLANDO, FL, MARCH 12, 2012 – McCree General Contractors, Inc. is designing and building The Church of Jesus Christ of the Latter Day Saints' new building located at 616 Southwest 12th Avenue in Miami, Florida. Construction is scheduled to begin later this year.

The church's existing 6,800 square foot building is much too small for the growth they have been experiencing. The new 13,652 square foot, 2-story design will provide plenty of office space, classrooms, a larger chapel, and cultural center. At this point, construction is estimated to take place in three phases, with construction of the new building, demolition of the existing building, and completion of the entire site. The \$4.2 million project has been designed according to the new 2012 Florida Building Codes, including the 186 mile per hour wind code, and the category 3 exposure codes. Not only will the building and the site be aesthetically improved for the Church of Jesus Christ of the Latter Day Saints, it will be able to withstand the elements and be a beautiful fixture on the site for years to come. For now, the project will be creating much needed construction jobs for the area.

For the past 85 years, McCree has been providing concept to completion Design / Build services for numerous project types and serves as Central Florida's oldest Design / Build firm. McCree is a truly integrated design-builder with licensed architects, engineers, and contractors all working in concert to ensure every project is delivered on-time, within budget and exceeding the owners quality expectations.
