FOR IMMEDIATE RELEASE:

MCCREE IS AWARDED DESIGN-BUILD CONTRACT BY THE CITY OF LAKE MARY

ORLANDO, FL, August 12, 2013 – McCree was recently awarded the contract to perform Design-Build services to the City of Lake Mary. The project will involve the renovation of a city-owned structure into a community center to serve the entire local community.

The building is located at 140 Wilbur Avenue, Lake Mary, FL 32746, and it encompasses approximately 6,000 square feet to be renovated and repurposed. This project is scheduled for completion in 2014.

“McCree is always excited by opportunities to work with Central Florida municipalities to improve local communities,” said Richard McCree Jr., the CEO and President of McCree.

McCree has been performing Design-Build services for the Central Florida Community for over 50 years. The Design-Build method ultimately saves both money and time by combining the duties of an architectural firm and a general contractor under one roof, and this allows McCree to accept complete responsibility for a job from design to final completion. McCree has been working with local governments for decades, and the dedication of McCree’s integrated in-house team of architects, engineers, and general contractors remain dedicated to honesty and the highest quality construction.
